 custom-made product: printing on both sides

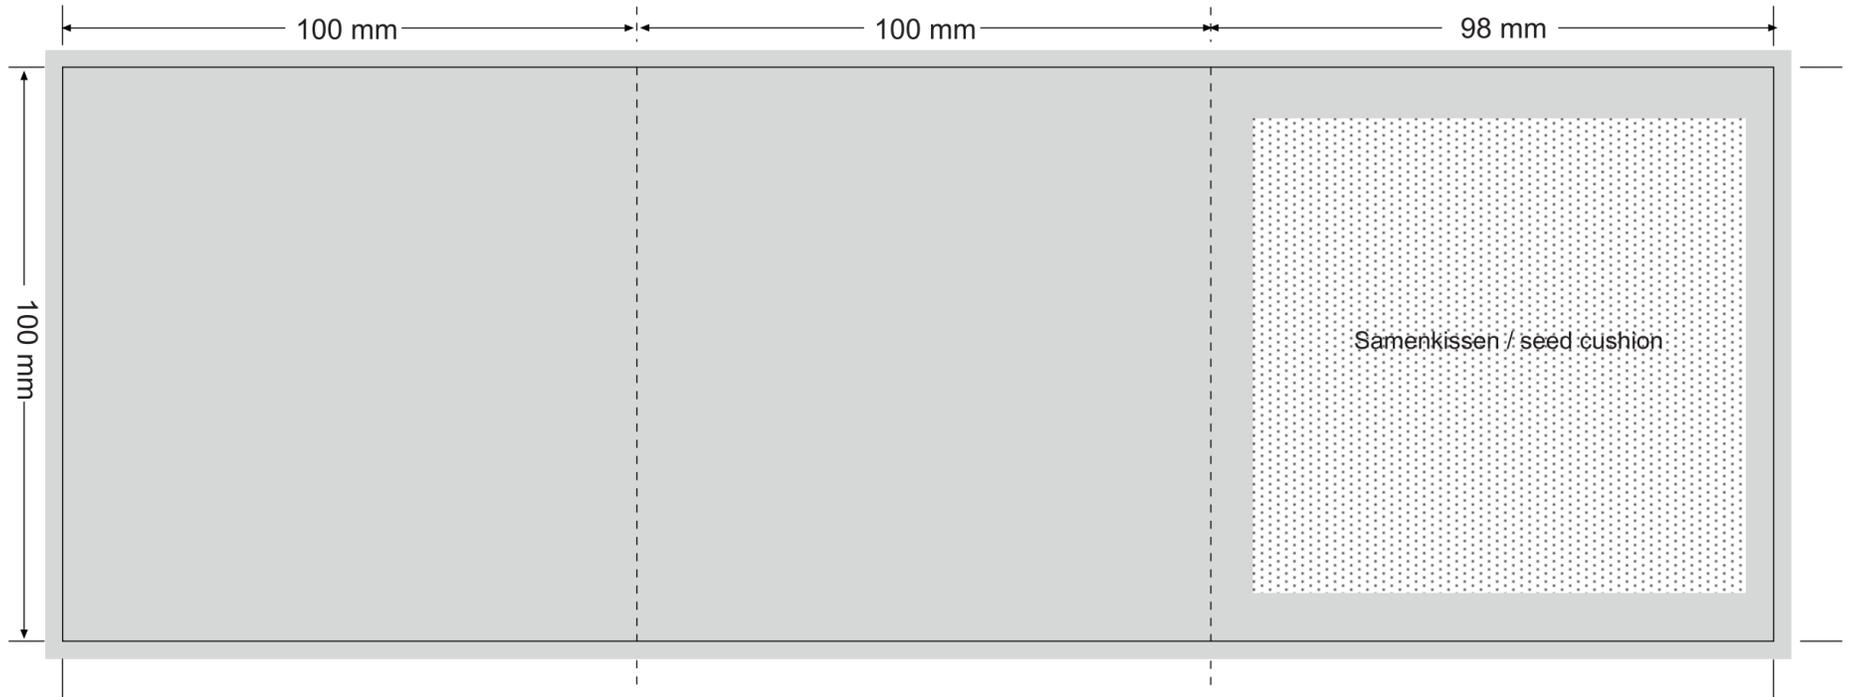

Aussenseite / outside

1. Take the seed cushion out of its packaging, place it smooth-side down in a container filled with soil. Cover with a thin layer of soil.
2. Place the plant container in a warm, light place and water it regularly.
3. With a little patience, you can carefully transfer the young plants, without damaging the roots, from the container to a sunny spot in your garden or plant them in a window box.
